HOMESAVERS SCANNER · USER GUIDE

Deleting Department Check & Price Check records

How to permanently remove Department Check (J) and Price Check (K) records from Reports — including everything that matches your filter, not just the page on screen.

⚠ **Delete is permanent.** Deleted records are gone from the database for good — there is no undo.

Where: **Reports → HO records** | Applies to: **Department Check & Price Check only**

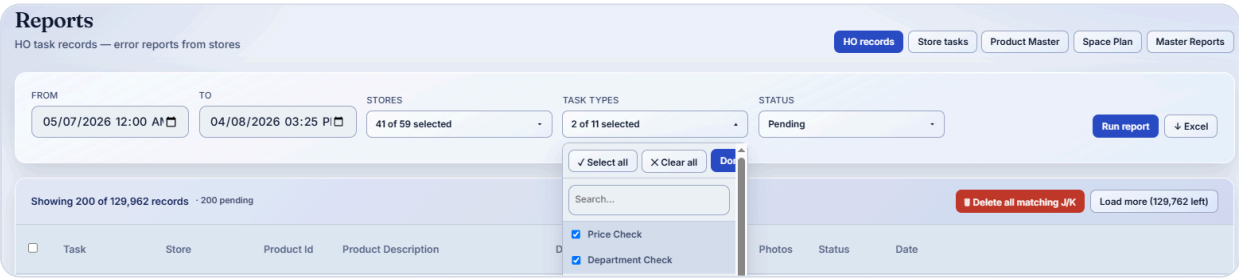

Who: **every logged-in user** (stores limited to their own stores)

1 Open Reports and set your filters

Go to **Reports → HO records**. Choose your **From** / **To** dates, the **Stores**, and a **Status** if you want (e.g. **Pending**). These decide exactly which records get deleted.

2 Pick the task types, then run the report

Open **Task Types** and tick **Price Check** and **Department Check** (untick everything else), press **Done**, then click **Run report**.

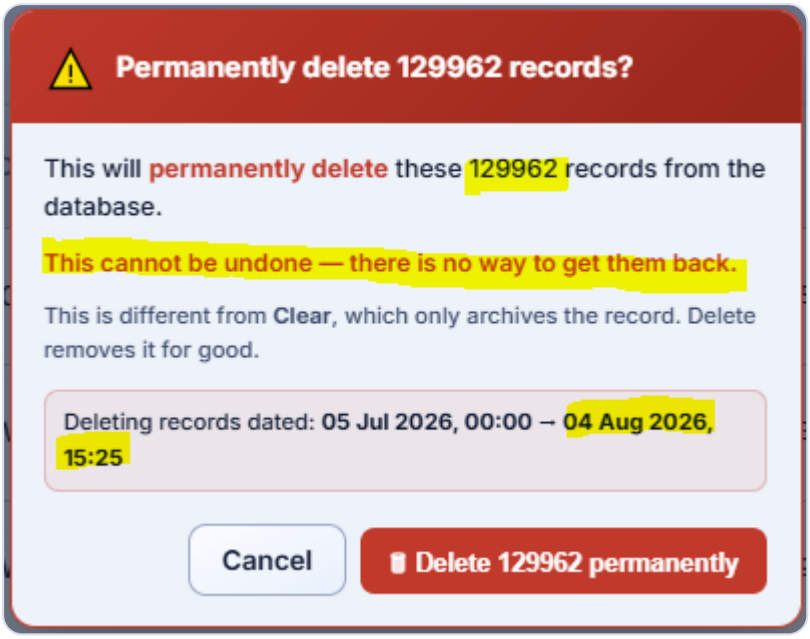

Task Types → Price Check + Department Check selected. The red **Delete all matching J/K** button sits at the top-right of the results.

3 Click “Delete all matching J/K”

In the results header, click the red 🗑 **Delete all matching J/K** button. This targets **every** matching record across all pages — not only the rows currently loaded.

4 Check the confirmation box carefully

A red box shows **how many records** will be deleted and the exact **date range** (“Deleting records dated…”). Make sure the count and dates are what you expect.

Confirmation box — check the **record count** and the **“Deleting records dated”** range before confirming.

5 Confirm, then let it finish

Click **Delete … permanently** to go ahead, or **Cancel** to stop. Large deletes are removed in batches and can take up to a minute — leave the page open until it finishes.

💡 **Keep the app fast.** Once a Department Check or Price Check has been completed, please delete its records from the app. Removing finished checks keeps the database lean and reduces load, so the app stays quick and responsive for every store.

- To delete a **single** record instead, use the red 🗑 **Delete** button on that record’s row — the same confirmation box appears.
- Only **Department Check** and **Price Check** can be deleted this way. Other task types keep the normal Head Office review flow.
